

BROAD STREET TO SHINE WITH EASTER FINERY

\$500 in Prizes to Reward Winners in Show of Spring Clothes

Philadelphia will have its own "board-walk promenade" on Easter.

Instead of going to Atlantic City to display the beauties of their new spring clothes, folks can do it this year right here in Philadelphia.

The plan was hatched today by the Fairmount Avenue Business Men's Association.

There is a gold watch and a large diamond stickpin that will be presented to the best-dressed couple in Philadelphia's first annual Easter parade.

There is a gold watch and a large diamond stickpin that will be presented to the best-dressed couple in Philadelphia's first annual Easter parade.

Large department stores, millinery stores and others are co-operating with the idea, and will take advantage of the chance to display their newest and most attractive finery in the parade.

Anti-Cobden Club to Elect Officers

The annual election of the Anti-Cobden Club will be held tonight at the club's headquarters, 1944 Germantown avenue.

Workers in Demand at Hammonont

HAMMONTON, N. J., April 13.—There is a good demand here for female help, as the result of the operation of the William F. Taubel hosiery plant.

CRYPTIC CROSS HAD NO TERRORS FOR HUNDREDS

Continued from Page One

It was not until more than a week later that the next correct solution was received. The morning mail on March 20 brought a letter from J. H. Tracy, Wyn-

MANY SOLVE RIDDLE Mrs. Bertha K. Moore, of Barrington, N. J.; Mrs. Hoyt Merion, Pa.; Mrs. W. Aubrey Merrick, Newtown, Pa.; Joseph A. Carracha, 238 North 45th street, Philadelphia; Miss Ethel M. Thomas, Bureau of Highways, City Hall; F. M. Dixon, 2511 South Colorado street, Philadelphia; Victor P. Leach, 125 Pine street, Harris-

That such a large number of people were able to solve the cryptogram almost perfectly without any clue as to what it might be all about is considered remarkable by experts. A particular feature of note is the large percentage of women who were among the first to send in these solutions.

MORE ADVENTURES OF MONTE In view of the widespread interest aroused by the story of Monte Crispin, the Evening Ledger will soon print the second of the Philadelphia hero's adventures.

THE CORRECT SOLUTION TO THE CRYPTIC CROSS IS AS FOLLOWS: RE—PROPERTIES HELD IN TRUST M. C. IRON WORKS; WEST MILL, DOUBLEDAY; EX-TRA HEAVY DYNAMITE CHARGES; WIRELESS; 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

MONTE CRISPIN WINNERS

Above is P. E. Elaeaser, who won the second prize of \$50 in the Evening Ledger serial puzzle contest. Joseph H. Tracy got the third prize of \$25. Both are Philadelphians. The first prize of \$100 was won by a New Yorker.

Today of the method he pursued in solving the cryptogram said: "I had never tried anything of the sort before, but as I have been reading the Evening Ledger since it first came out, I thought I would see what I could do. So on the 10th of March, when the story of Monte Crispin was first announced, and I read that I could get the first instalment in a little book form, I went down to the Evening Ledger office and asked for one. That night at home I sat down and looked at the cross for about half an hour before trying to find where to begin. Then I laid out the alphabet in a line and placed under it the cryptic alphabet. Then I started in, beginning at every possible corner of the cross, without getting anything that would make sense. "After at least a hundred beginnings, that showed virtually from the outset that I was on the wrong track, I suddenly concluded that the 12 set apart in the corner was perhaps the key. So, taking the first letter D, as shown in the upper right hand corner of the bar of the cross, I tried selecting the 13th letter following the first letter D, which would be Q. These two when transferred to the corresponding letters in the cryptic alphabet gave me "Re"; and, following along this line, I knew just as soon as I had a few words that made sense that I was on the right track.

PHILIPS STUDIO

track. The rest was easy. It took me about three hours in all. I sent the solution in to the Evening Ledger office by messenger the next morning, March 11.

"I certainly am glad to have won the second prize, and I shall always read the Evening Ledger in the future, as I have in the past. Here is a copy of my solution, with the alphabets under it:

RE—properties held in trust M.C. Iron works West Mill double mined extra heavy dynamite charges wireless 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

Mr. Elaeaser is only a year graduated from the Southern High School, his preceding education being in the lower grades of Philadelphia public schools. He has been out of High School for about a year and with the Pennsylvania Railroad since August last. Previously, he had been in the employ of the Reed Duplicating Company, of Philadelphia. He lives with his parents.

POE'S "GOLD BUG" A KEY. Edgar Allan Poe's short story, "The Gold Bug," was the means Joseph H. Tracy, of Wynook, employed to solve the cryptogram of Monte Crispin. Mr. Tracy's solution, which was the third to reach the Evening Ledger, won him the third prize of \$25.

After deciding "The Gold Bug" and the directions the story contains for deciphering codes was the best way to set about attempting the solution, Mr. Tracy found his work easy. He finished it all, working out the correct answer, in a little more than an hour and a half, he said today.

Into "The Gold Bug" Poe put the knowledge he had gained in many years of studying cipher and codes. The story, dealing with the discovery of a fabulous fortune buried by the pirate, Captain Kidd, on an island on the South Carolina coast, turns on the solution of a cryptic message which gives directions for locating the treasure. Poe solves the message in the story and explains in detail how it is done. It was this that gave Mr. Tracy his key to the Monte Crispin cipher.

"I had looked over the story," said Mr. Tracy, "and when the cryptogram appeared I thought I'd try to work it out. It meant nothing to me until I thought of getting 'The Gold Bug.' Poe prints a key which he says will solve any cipher. He gives a list of the letters that occur most frequently in ordinary words, in the order of their frequency.

"I simply used that. It was comparatively easy. I saw almost at once that the cross should be read downward in the vertical columns, beginning at the right. Using the key from 'The Gold Bug,' and working out the letters in the vertical columns, it was not long before I had a skeleton idea of the message. I checked this over two or three times, adding letters, and presently had the solution. It would have been much more work without 'The Gold Bug' to help me."

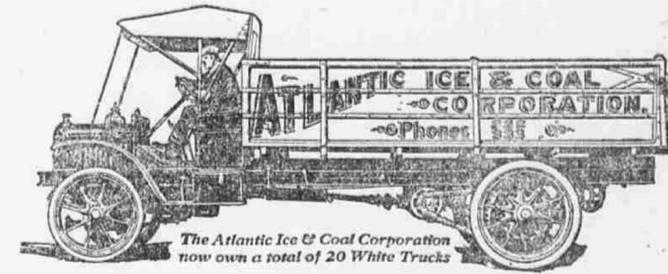

Find Missing Woman's Body The body of Mrs. Anna Cole, of 1536 Millin street, was found floating late yesterday afternoon off the Millin street wharf by the crew of the police boat King.

Conflicting Theories of Truck Design Versus Truck PERFORMANCE

THERE are four different types of final drive in motor trucks being advocated by their makers. Each has its merits—and demerits. It is impossible for the purchaser to determine their comparative values on a theoretical basis. He cannot reconcile the conflicting claims of rival engineers.

The wise buyer brushes aside mere theories of construction and selects the make which holds the record for performance. That is the only value he can know and the only value he can use. The White Truck record is reflected in its predominant annual sales— 2 to 1 of any other make.

THE WHITE COMPANY, Cleveland Philadelphia 216-220 North Broad Street

The Atlantic Ice & Coal Corporation now own a total of 20 White Trucks

All these famous men were once Poor Boys

NOT ONE ever had a College Education —Did You? ALL OF THEM bought and constantly used the Encyclopaedia Britannica —Do You?

THE ROMANCE OF ACHIEVEMENT

The days of the ever-new romance of the Poor Boy—with the Will to Win—are not over. The telegraph operator of yesterday is the Edison or Earling of today. Andrew Carnegie, John D. Rockefeller, Charles M. Schwab, almost all of our great captains of industry, started at the very bottom of the ladder. They climbed to the top because they gained the HABIT of OVER-COMING. They did not win because they had no college education or early advantages, but in spite of this.

THOMAS A. EDISON who will probably rank Benjamin Franklin as America's greatest inventor, began life as a telegraph operator.

The Passion of Great Minds

There is one conspicuous trait common to all these dominating men. That is a PASSION FOR KNOWLEDGE. And it is curious to find how deeply almost all of these men have been influenced by the Encyclopaedia Britannica.

Mr. Edison has a mind that is simply a mine of varied information, that is a perpetual source of surprise to those who associate with him. Where he got it all is beyond their comprehension.

So with James J. Hill. The extraordinary range of his information has been one of the secrets of his amazing success. Whether it be the price of nails in Yokohama or what could be grown in the soils of Montana, he seems to know everything that could draw traffic to his railroad.

HENRY C. FRICK began clerking in his uncle's store, and then went into the textile business in a small way. He has long been one of the dominant figures in the steel industry and in the Steel Corporation.

But they all had in the highest degree the Passion for Knowledge

THE LATE JOSEPH PULITZER, who came to this country—like Andrew Carnegie and many another—in the steerage, and rose to be the foremost newspaper editor of his time, bought no less than 18 sets of the new Eleventh Edition.

The meaning of all this is that the day of the Poor Boy Who is Determined to Get On has not gone by. However helpful a college education may be in many walks of life, the lack of it is not a bar to advancement to the highest rank in American life. The essential thing is the grit to make up for this lack, and finding the way to do it. For this the Encyclopaedia Britannica, in its new Eleventh Edition, is the incomparable work. It is a university training in itself.

CYRUS H. K. CURTIS the owner of two of the most widely circulated journals in the world and probably the richest publisher, began as a newsboy in Portland, Maine.

Did You Miss a College Training?

There is no need to be ashamed if you did; 97 out of every 100 American men and American women have gone to school. But you cannot do without a great, resourceful FUND OF KNOWLEDGE. And there is no place in the world where you can gain this so quickly as from the same place that Edison and Joseph Pulitzer and Andrew Carnegie and James J. Hill and thousands of others gained theirs—from the Encyclopaedia Britannica.

Many persons believe that this "unofficial work" is rather for "scholars" and college professors and rich folks. The examples already given prove that it is precisely the opposite.

CHARLES M. SCHWAB who became the foremost individual steel maker of the world began life carrying a surveyor's chain.

Send For It To-day You Must Act Quickly

The remarkable bargains we are offering can last only a little while longer. The contracts for the "Handy Volume" issue were made before the war began. The drastic increase in the cost of raw materials makes it impossible to renew them. Paper has advanced over 25 per cent—leather more than 50 per cent—binders' boards 50 per cent, etc.

The publishers notify us that after the sets now on hand are exhausted they cannot supply any more at the present low prices. Therefore you should not delay a day in sending for the 130-page descriptive book, and full details as to this offer.

JAMES J. HILL the transportation genius of this generation, graduated into Philadelphia from the truck line.

A Richly Illustrated 130-Page Book About It

The publishers of the ENCYCLOPAEDIA BRITANNICA have prepared a richly illustrated book of 130 pages to tell you all about this great work and the new "Handy Volume" issue, and its usefulness to you. It is full of interesting stories, clever dialogues, beautiful pictures—a book packed from cover to cover. Some of its contents include:

100 interesting bits of knowledge revealing the ENCYCLOPAEDIA BRITANNICA from a hundred different points of view. —A little history of the BRITANNICA during the days of King George III, with 70 portraits of the noted men who have made it the greatest work of its kind. —Twenty pages of interesting dialogue telling of the interest of the BRITANNICA for women. —A clever story about the way children get interested in it. —Portraits of the Nobel Prize winners and other famous contributors to the new Eleventh Edition. —Nearly two hundred half-tone illustrations, color plates, specimen pages and the like. —A hundred interesting questions and brief answers; and some other questions.

Whether you are interested in the BRITANNICA or not, you and every member of your family will thoroughly enjoy reading this book, as big as a magazine.
